The JSA Difference

100% of our clients would recommend us

- Every project
- Every service
- Every client
- Over 50 years

That kind of record does not happen by accident.

The JSA Difference

Over 50 years Independent

- Multi Brand. Still family-owned
- No manufacturer affiliation
- No corporate ownership
- Genuine impartial advice - Always

The same family that started the business is still running it.

The JSA Difference

- UK Landmarks
- London Iconic buildings
- Premier League Facilities
- Sporting Stadiums

Not selected case studies - The actual client list.

When the UK's most prestigious buildings need their climate systems trusted to someone, they call JSA.

The JSA Difference

Commercial Cooling

Providing thermal comfort for occupants and reliable process cooling for industry. Our Chiller Solutions

- Air-cooled Chillers
- Water-cooled Chillers
- Evaporative Chillers
- Natural Refrigerant Solutions
- Turbocor Technology
- Chemical-Free Water Treatment
- Service, Repair & Breakdown Support
- Planned Preventive Maintenance
- Portable Hire Units

Key Benefit:

Average 15–25% efficiency gains achieved through our Chiller optimisation and upgrade projects.

JSA Service delivers one of the most comprehensive ranges of commercial and industrial Chiller systems in the UK.

We specialise in reciprocating, centrifugal, screw, and absorption technologies.

From design and turnkey installation to project management, dilapidation reports, major modifications, and full system refurbishments, **we provide complete, future-proof cooling solutions.**

Commercial Heating

High-Efficiency, Low-Carbon Heating Solutions for industrial and commercial applications.

We help businesses significantly reduce their carbon footprint while lowering operating costs through advanced heating technologies.

Our Heating Solutions

- Air, Water & Ground-Source Heat Pumps
- Air Handling Units
- Heat Exchanger Cleaning & Optimisation
- Retrofits, Service & Repair
- Planned Maintenance

JSA Service provides next-generation, low-carbon heating systems designed to meet the growing demand for sustainable energy solutions. Our heat pumps deliver exceptional efficiency with dramatically reduced emissions.

We offer a full range of commercial and industrial heat pumps (Air, water, and ground-source) specifically engineered for retrofit projects, new builds, production facilities, and manufacturing environments.

Transition to low-carbon heating today.

Energy Audit

With over 50 years of specialised expertise in Chiller and HVAC/R systems, JSA Service conducts thorough, independent energy audits to help clients significantly reduce energy consumption, lower operating costs, and enhance system performance.

Our Audit Process

- Initial Consultation & Site Survey
- Data Collection & Continuous Monitoring
- Detailed System Analysis & Performance Testing
- Comprehensive Reporting with Clear Recommendations
- Implementation Support & Project Management

Typical Client Benefits

- 10-30%+ reduction in energy consumption
- Lower carbon emissions and improved sustainability
- Enhanced system reliability and extended equipment life

Our independent specialist approach ensures every audit is practical, actionable, and delivered by experienced industry engineers who understand real-world HVAC and Chiller operations.

Unlock 10-30%+ Energy Savings

HVAC Maintenance

JSA Service are experts in chillers, refrigeration, and complete HVAC/R systems.

We support commercial, industrial, and critical infrastructure clients to minimise downtime, reduce energy costs, and maintain full regulatory compliance.

Our Maintenance Services

- Planned Preventative Maintenance (PPM)
- Chiller Servicing & Optimisation
- TM44 Air Conditioning Energy Assessments
- Air Handling Units, Fan Coil Units & Ventilation Systems
- Controls, BMS & Energy Efficiency Upgrades
- Breakdown Call-Out & Emergency Repairs
- Full Documentation & Compliance Reporting

With a proactive approach and highly skilled engineers, we ensure your systems operate at peak efficiency, reliability, and compliance year after year.

Protect your critical systems.

Book your Planned Preventative Maintenance review today.

HVAC • Chillers • Heat Pumps • Refrigeration

HVAC/R Technology

Measuring and optimising the performance of your air-conditioning, refrigeration, and heat pump systems is a top priority at JSA Service.

Our advanced HVAC/R monitoring solutions use smart IoT sensors and Condition-Based Monitoring to deliver real-time visibility into energy consumption, system efficiency, and equipment health.

Key Benefits

- Significant reduction in energy use and operating costs
- Improved environmental performance and lower carbon emissions
- Reduced unplanned shutdowns and business interruptions
- Fewer maintenance visits through predictive insights
- Early detection of issues (temperature, refrigerant pressure, water leaks, and more)

By simply adding intelligent sensors to your existing equipment, JSA's smart monitoring can start delivering measurable savings and greater reliability immediately.

Ready to optimise performance and reduce costs?

Contact our specialists today for a no-obligation monitoring demonstration.

Parts & Spares

JSA Service provides fast access to genuine and specialist spare parts for the majority of Chiller and HVAC/R systems.

With decades of industry experience and an extensive network of suppliers, we deliver effective solutions to even the most challenging parts enquiries — often when others cannot.

We supply genuine spares for leading manufacturers including:

- Airedale • Carrier • McQuay • Trane • York
- Plus many other established and reputable brands.

Our reputation is such that major manufacturers frequently choose JSA to source and supply spare parts for their own customers on discontinued or difficult-to-support equipment.

Need parts fast?

Contact our spares team today for expert assistance.

Turnkey Solutions

At JSA Service, we deliver complete turnkey solutions for commercial chillers, heat pumps and HVAC systems.

From the initial site survey and system design through to equipment supply, installation, commissioning and ongoing maintenance, we manage every stage of the project. This single-point responsibility removes the hassle of coordinating multiple contractors and ensures the finished system performs exactly as specified.

Our experienced team handles complex installations, energy-efficient upgrades and full system replacements nationwide. Whether you need a new high-efficiency chiller plant, a heat pump retrofit, or a complete HVAC overhaul, we take full ownership from concept to completion — and beyond.

One team. One point of contact. A solution that works.
